

- ***APPARENT
PAPER***

APPARENT BEFORE WE

START, I WOULD LIKE TO TELL YOU HOW APPARENT CAME TO BE: "FROM IDEA TO REALIZATION". FOR THOSE WHO ARE NOT INTERESTED, YOU CAN GO STRAIGHT TO THE LINKS BELOW - THERE IS ALL THE TECHNICAL INFORMATION ABOUT ALL OUR PRODUCTS , IN THE SPRING OF 2023 IT BECAME CLEAR THAT THE CRYPTOCOMMUNITY WAS TIRED OF PROMISES AND THAT PEOPLE NEEDED A GOOD BIG PROJECT, WHICH WOULD NOT ONLY HAVE SOME PROMISES BUT ALSO SOMETHING READY TO GO.

WE ARE THE DEVELOPERS. THE FIRST THING THAT WAS DECIDED WAS: "FIRST DO SOMETHING, THEN PRESENT IT. THAT'S HOW THE IDEA OF THE BIG PROJECT APPARENT WAS BORN. THE FIRST DEVELOPMENTS OF THE BLOCKCHAIN APPEARED ALREADY IN SUMMER. IT WAS LAUNCHED AND WORKED, BUT WE WANTED MORE AND BETTER RESULTS. AND EVERY TIME WE REACHED THE GOAL, IT DIDN'T SEEM TO BE ENOUGH. SO BY THE FALL OF 2023, APPARENT WAS ALREADY A BIG BLOCKCHAIN PROJECT, WITH ALL THE TOOLS WE NEEDED TO MAKE BLOCKCHAIN WORK, SUCH AS DECH SWAPS, BRIDGES TO OTHER NETWORKS, MINING, AND MANY OTHER DETAILS.

BLOCKCHAIN

But when one of the most famous blockchain, Ethereum, did move to the PoS consensus, it became clear that the era of mining was ending, so we decided to redesign everything. Nuberium blockchain on PoS consensus appeared, but a different approach and more modern algorithms were used. We achieved amazing results: speeds and number of transactions per second increased up to 10,000, commissions were reduced to almost zero. These results showed that now anything is possible! Even a blockchain-based social network, which the world needs, is possible! And we started working on it (of course, the work on it is not finished yet and we can't present it in full yet, but the process is going on and it won't stop). One day, while working on creating a new blockchain, redesigning all the tools for it and the social network, the idea of combining A.I.(APPARENT network) and blockchain came up. It turned out to be real! And now it works! The functionality is not great yet, but this direction will be developed. Now our Nuberium can generate NFT for you, right to your wallet. In a few simple steps (if, of course, you already added Nuberium main net to your metamask), logging into the Nuberium network interface by wallet, you send a text request, pay a small fee, and get a ready NFT in your metamask. These are basic neural network abilities, but they already work, and you can easily check it.

WEB3

Also, one of our developers had a dream – a good quality game with NFT-auction, where the transactions from the game work instantly. Previously this was impossible to do on other networks, but now it's a reality too! By the way, he writes a trilogy of books, based on which the game will be created. And we know that he has already written half of the first book. If you're interested, you'll also find information about it in the Soon section.

About APPARENT

But even this was not enough for us... Even though we already had a concept of energy efficient blockchain, quite by chance our team found people, whole communities, who still want to mine coins with their equipment. It was decided to make not just a blockchain, but a multi blockchain with support for several algorithms interconnected with each other. This way we will become interesting to another, but still large, part of the cryptocurrency community.

As a result, by presenting Nuberium today, we are showing a full working product that has:

- Several interconnected blockchains;**
- Bridges to the outside world, to the BSC and ETH networks (APPARENT will be launched in two networks simultaneously**
- SWAP, which operates on the principles of a decentralized exchange;**
- A neural network that generates images on demand and sends the finished result as an NFT immediately to your wallet;**
- Availability in Matamask;**
- Possibility for developers to create new projects now on our blockchain (for example, all kinds of decentralized applications, meme tokens (how soon will we see APPARENT)**

- **Staking & Mining;**
 - **Blockchain Observer;**
 - **The social network is in development mode, but there is already a concept and developments, you can find the first version of its page in the corresponding section.**
- And the most important thing for an investor is that Nuberium has simply incredible opportunities for development and growth. Our future plans:**
- **First of all, it will be Apparent wallet for mobile devices and computers.**
 - **Work will continue on the social network and nube network.**
 - **There will be an expanding team to work on the game.**
- You can see the roadmap in detail in the appropriate section.**
